#### SAMPLE PAPER FOR CLASS V ENGLISH

#### 1.Read very carefully through the following passage and then answer the questions:-

A. Answer the following questions:-

Although there are many kinds of rhinoceros, this is yet another animal that is slowly dying out, due mainly to the greed of man. The value placed on the ivory of the African elephant, the skin of the Asian tiger, and the horn of the rhino, has put all these animals in grave danger.

The word "rhinoceros" is from Greek, meaning nose-horn, and the animal is so named because of the large horn growing out to the end of its nose. The rhino uses its horn for defence and for uprooting bushes and small trees; on whose leaves or fruit it feeds

The hide of the rhino is very thick and tough, almost bulletproof. Its eyesight, however, is poor, and it is unable to see object which are directly in front of it but its scent and hearing are acute, and warn it of approaching danger. The skin of this massive creature is divided in to great shields by heavy folds in front of the thighs.
